Face Login Mandatory Settings

Introduction

To enable Face Login in our labs and classrooms, some of our applications need temporary access to your device's camera while running from local IP addresses on the campus network.

Because browsers normally restrict camera access on non-HTTPS (local) sites, you'll need to add our approved local IPs to a browser setting so they're treated as secure origins. This one-time change allows the camera prompt to appear and Face Login to work reliably for our apps.

The steps in this guide show how to do this in **Chrome**, **Brave**, and **Edge** by using the **unsafely-treat-insecure-origin-as-secure** flag and entering your Tessellator (local) IP, then relaunching the browser to apply the change.

Important: Only add the provided campus/local IPs and use this setting solely for class activities. Do not add unknown sites. You can remove the entry at any time after your session or assessment. If you need help, contact the support team.

Steps

1. Open your browser and navigate to the following URL based on your browser:
    1. **Chrome:**chrome://flags/#unsafely-treat-insecure-origin-as-secure
    2. **Brave:**brave://flags/#unsafely-treat-insecure-origin-as-secure
    3. **Edge:**edge://flags/#unsafely-treat-insecure-origin-as-secure
2. Enter your Toofaan IP, set the option to **Enabled**, and then relaunch the browser to apply the changes.

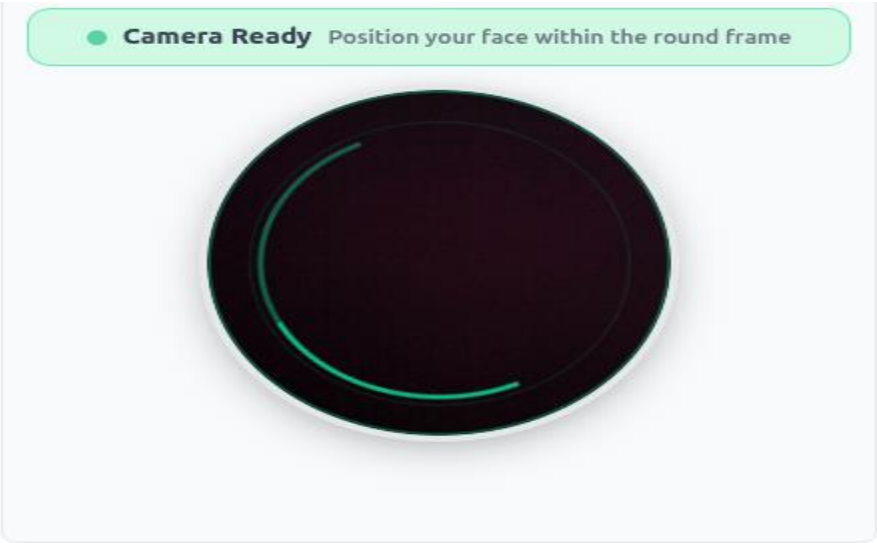
FAQ — Face Login (TOOFAAN)

1.Camera Showing Blank

Q: Camera is allowed but the preview is blank. What now?

Select the correct camera:

- Chrome → **Settings** → **Privacy and Security** → **Site Settings** → **Camera**
- Choose your working camera (Laptop/USB/Mobile webcam)
- Refresh the TOOFAAN/Netra page and try again



Failed to fetch

Q: Shows “Failed to fetch” error?

If you see a “Failed to fetch” error, check your Wi-Fi connection and make sure the device is connected to local network.

“No record found. Your face is not yet registered.”

Q: Why do I see: “No record found. Your face is not yet registered in the system.”

1. First verify your Hall Ticket number is entered correctly.
2. If correct, complete face registration:
    1. Open the **Netra** app → Login
    2. Go to **Face Registration**
    3. Complete registration
    4. Try face login again in TOOFAAN

“Invalid image”

Q: I see: “Invalid image. Please use a clear camera view with good lighting.”

- Sit in good, even lighting (avoid bright backlight)
- Keep your full face in the frame
- Remove masks/scarves
- Look straight at the camera and retry

Low Matching Percentage (e.g., 45%)

Q: Matching percentage is low many times (e.g., 45%).

- Sit closer so your face fills most of the frame
- Avoid reflections or glare
- Keep your head steady
- If matching stays below 65% in both Netra and TOOFAAN:
    - Contact your mentor to reject your current face registration
    - Re-register in Netra using:
        - Good lighting
        - Good front camera (mobile)
        - Straight face pose
    - Try face login again

Face Registration Rejected

Q: I see: "Your face registration rejected, please re-register your face in Netra and try login."

- Open the **Netra** app
- Re-register your face with proper lighting and straight pose
- Ensure no glare on glasses
- Then try face login again in TOOFAAN

Not Able to Login to Netra

Q: I cannot login to the Netra app.

- Contact your Trinetra/Netra admin
- Request a credential reset
- Login with the new credentials and complete face registration

Laptop Camera Not Working

Q: My laptop camera isn't working. How can I still use face login?

- Use your mobile as a webcam (DroidCam, Iriun, etc.)
- OR connect a basic USB webcam
- Choose this camera in browser settings → **Camera**

TOOFAAN IP Not Opening

Q: The TOOFAAN IP (e.g., http://10.11.52.100) is not opening.

- Connect to the correct college Wi-Fi/network
- Check the IP and port (e.g., http://192.168.2.5:81)
- Try opening in Google Chrome
- If still not opening, inform your lab admin/mentor (server may be down)

Face Login Slow or Stuck

Q: Face login keeps loading or is very slow.

- Close other apps using the camera
- Check your network
- Refresh and retry

- If many students face this, contact mentor/admin (server may be busy)

Recommended Browser

Q: Which browser should I use for face login with TOOFAAN IP?

- Use **Google Chrome (latest)** for best performance
- If using Brave or Edge:
    - Enable **Insecure origins treated as secure**
    - Allow camera access for the site
